

## **Community partner details and feedback:**

**Name of the person:** Ramesh

**Age:**35

**Occupation:** Teacher

**Mobile number:**8654125505

**Email:**ramesh505@gmail.com

**Do you think the project addresses a significant need or problem in the community?**

Our project on tour guide app TOGOTU which empowering local as guides and helps tourists with their knowledge to explore tourist sites. which comes under SDG 8 decent work & economic growth.

**Are there any additional features or capabilities you believe should be included in the detection system?**

Regarding additional features,importing gps navigation database, user-friendly interfaces for reviews, and enhancing security measures could further strengthen the system's efficiency and reliability.

**What future initiatives or projects related to fake product detection do you think we should consider?**

This would be suitably complemented by possible future initiatives such as AR tours, AI-powered recommendations, multilingual support, eco-friendly options, partnerships with local businesses, offline access, virtual tours, and enhanced community features. These features will make the experience richer, healthier for the environment, and blossom into a travel community
